Report Overview

SECTION DESCRIPTION

- This section presents an overview of the content of this report. The next of kin survey data and analysis presented in this report only pertains to experiences with state Veterans cemeteries. Since there were no tribal cemetery interment records available in BOSS, no surveys were mailed to next of kin about tribal Veterans cemeteries.

Report Overview

Report Overview

NCA strives to provide the best service and to be the model of excellence for burial and memorials for our Nation's Veterans and their families. The data from the administration of this survey helps NCA to assess its compliance with the Agency's mission to honor eligible Veterans, active-duty Service Members and eligible family members with final resting places in national shrines and with lasting tributes that commemorate their service and sacrifice to our Nation. Further, the feedback from next of kin and funeral directors serves to improve NCA policy, planning, and operational efforts as it relates to the quality of the services provided to Veterans and their families. The 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey and the state, tribal or territorial Veterans cemeteries component of the 2024 Funeral Director Satisfaction Survey represent the eleventh national administration of this satisfaction survey and the eleventh time a web survey option was offered to respondents.

Data for the 2024 survey were collected from next of kin (NOK) and funeral directors (FD) in two fieldings:

2024 Survey Fielding Schedule			
Cohort	Survey Fielding	NOK/FD	Interment Population
Cohort 1	2/22/24 – 6/17/24	NOK (English)	1/1/23 – 6/30/23
		FD (English)	1/1/23 – 12/31/23
Cohort 2	3/29/24 – 6/17/24	NOK (English)	7/1/23 – 12/31/23
		NOK & FD (Spanish)	1/1/23 – 12/31/23

Next of kin and funeral director mailing data were extracted from NCA's Burial Operations Support System (BOSS) and Automated Monument Application System (AMAS) database of interments. The survey was mailed to 19,010 next of kin who had interred a loved one at a state Veterans cemetery during the time period of January 1, 2023 through December 31, 2023. The survey was also mailed to 12,280 funeral directors who had worked with VA national cemeteries, private cemeteries, and state, tribal, or territorial Veteran cemeteries for the interment of a Veteran or eligible family member during the designated time period. A total of 10,810 completed questionnaires (8,202 next of kin and 2,608 funeral directors) were returned, which resulted in an overall survey response rate of 35.59% (44.53% for next of kin and 22.06% for funeral directors). The survey response rate calculation excludes those returned as not deliverable.

The next of kin survey data presented in this report only pertains to state Veterans cemeteries. Since there were no records of tribal cemetery interments in the BOSS database, no records were sent to next of kin about tribal Veterans cemeteries.

In this report survey findings are presented in ten sections:

- The first section depicts Key Performance Indicators (KPIs) derived from NCA's strategic performance measures and includes the associated KPI Targets. Survey items provide information on next of kin and funeral director overall satisfaction with state, tribal or territorial cemeteries.
- The KPI Section contains questions and metrics that would normally fall into one of the other sections of this report. However, each question and result will only be presented once with the exception of comparative analysis.
- The remaining sections present survey findings on specific areas of satisfaction for each group (next of kin and funeral directors).

Report Overview

- Finally, where applicable, data for questions asked across multiple years are presented, allowing the reader to assess changes in respondent satisfaction over time.

Six appendices follow the main body of the report:

- Appendix A: Respondent Characteristics – presents self-reported demographic information for next of kin and funeral directors in the respondent sample.
- Appendix B: Methodology and Survey Instruments – describes the methodology used to administer the survey. Copies of the 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey and 2024 Funeral Director Satisfaction Survey are also included in this appendix.
- Appendix C: User Guide – presents an explanation of how to read and interpret the graphs and tables used throughout the report.
- Appendix D: Question Locator – provides a reference chart that lists each survey item and the corresponding report page number the data can be found.
- Appendix E: Response Rates – presents response rates for the 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey, the 2024 Funeral Director Satisfaction Survey, and the cemeteries included in the survey.
- Appendix F: Survey Results by Question – reports the next of kin and funeral director survey results by question.

When applicable, aggregate and break-out views are presented for next of kin and funeral director respondents of the same question. A sample stacked bar graph is presented below (see Figure 1) with labels to aid in interpretation of these graphs used throughout this report. Appendix C (page 189) further details how to interpret the graphs and tables used in this report.

Due to rounding, some percentages may not sum to 100%.

Project Background

To better assess satisfaction with services provided by state, tribal or territorial Veteran cemeteries and to measure process performance, the National Cemetery Administration (NCA) Office of Finance and Planning contracted with Vistra, a communications strategy and professional solutions firm, to conduct the 2024 Survey of Satisfaction with State, Tribal or Territorial Veteran Cemeteries. The 2024 survey represents the eleventh national administration of this satisfaction survey and the eleventh time a web survey option was offered to respondents.

Data for this 2024 survey were collected from next of kin and funeral directors in two fielding periods:

2024 Survey Fielding Schedule			
Cohort	Survey Fielding	NOK/FD	Interment Population
Cohort 1	2/22/24 – 6/17/24	NOK (English)	1/1/23 – 6/30/23
		FD (English)	1/1/23 – 12/31/23
Cohort 2	3/29/24 – 6/17/24	NOK (English)	7/1/23 – 12/31/23
		NOK & FD (Spanish)	1/1/23 – 12/31/23

Mailing data was extracted from NCA’s Automated Monument Application System (AMAS) database and the Burial Operations Support System (BOSS) for records with interment dates from January 1, 2023 to December 31, 2023.

Surveys were mailed to 19,010 next of kin who had interred a loved one at a state, tribal or territorial Veteran cemetery. The survey was also mailed to 12,280 funeral directors who worked with VA national cemeteries, private cemeteries, and state, tribal or territorial Veterans cemeteries for the interment of a Veteran or eligible family member during the same designated time period.

This appendix presents the detailed methodology used to conduct and administer the surveys, as well as the 2024 survey instruments used for the study. It is presented in the following sections:

- Survey Development
- Sampling
- Mailing Protocol and Schedule
- Survey Help Line
- 2024 Survey Instruments

Survey Development

The survey instrument used for the 2024 survey administration was developed from the 2023 survey instrument. Several modifications were made to the 2023 survey instruments to develop the 2024 versions. These modifications are summarized below. The question numbers in the list below refer to the numbers in the 2024 questionnaires.

The final 2024 questionnaires included a total of 72 questions for next of kin, and 48 questions for funeral directors.

Sampling

Sampling Frame

The sampling frame for the 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey included all the state, tribal or territorial Veterans cemeteries where a Veteran or family member was eligible to be interred during the 2023 calendar year. Cemetery lists change from year to year as new cemeteries are added. For the 2024 survey fielding there were 175 state, tribal or territorial Veterans cemeteries available for Veteran and next of kin interments.

The sampling frame utilized for the 2024 surveys was provided to Vistra by NCA in two installments – one for January 1–June 30, 2023 interments and one for July 1– December 31, 2023 interments. The initial step was to clean the data and remove records that included fields with missing data critical for successful mailing. In 2024 the BOSS national cemetery and BOSS state, tribal or territorial Veterans cemetery data files were cleaned together.

Reasons for exclusion in descending order of frequency were:

- 1) Duplicate
- 2) Not NOK
- 3) No name
- 4) No address/Incomplete address
- 5) Invalid names*

STVC NOK Excluded Records	
Total excluded	5,833
Total available	41,288
Percent excluded	14.13%

Appendix B: Methodology and Survey Instruments

As in previous iterations, the funeral director survey was a census, but data cleaning was still conducted so as to prevent duplicate surveys from being sent to the same funeral home. Duplicate addresses are far more common with this population than next of kin surveys. Of the 299,644 total available funeral director records, 95.76% were removed as a result of various de-duplications, with 12,694 deemed usable.

The records that were deemed eligible, or usable, were based on the American Association for Public Opinion Research (AAPOR) referenced by the federal government. AAPOR classifies the eligibility of data by disposition codes for mail surveys** into categories of “mail surveys of specifically named persons” and “internet surveys of specifically named persons.” AAPOR’s disposition codes inform which records are eligible, or usable, from which to draw sample. Of the 41,288 total available next of kin records, 14.13% of were excluded from sample selection due to missing data required to have a “usable” record to include for sampling purposes, with 35,455 deemed usable.

Usable Records Available for Sample Selection		
Group	Available Records	Usable Records
STVC NOK	41,288	35,455
Funeral Directors	299,644	12,694

Sample Selection

The 2024 sample selections for next of kin and funeral directors had the overarching goal of achieving comparability with past administrations of the NCA Customer Satisfaction Surveys to avoid a break in the series of survey administration and strive for full comparability from survey administrations in recent years.

As in previous iterations, the 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey employed sampling whereas the 2024 Funeral Director Satisfaction Survey used a census, which included every available unduplicated record.

The second stage of sampling utilized stratification by creating groups, or strata, from which records were selected using simple random sampling (SRS) with different percentages applicable to certain stratum. For example, a policy decision of NCA over all survey administrations has been to select 100% (or a census) of interments at any cemetery with 100 or fewer interments. The cut points and percent of records selected, or probability, within each stratum are provided in the table below.

Appendix B: Methodology and Survey Instruments

Stratum Creation by Cemetery Size	
Number of Interments per Cemetery	Percent of Records Selected
100 or less	100.00%
101 or more	50.00%

For the 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey, probability-based sampling was used; this took into account confidence levels, margin of error, variance, and population size. Probability based sampling means that the likelihood of selection for the sample drawn from the population will be known. In contrast, non-probability samples such as convenience samples will gather information from any group that happens to be available at a given place or time, so they are not truly representative. Sampling at random after stratifying the frame from which the sample is drawn is the best method that alleviates sources of error that can bias estimates.

The confidence level for this 2024 survey was 95 percent ($\alpha = 1 - 0.95$, or $\alpha = 0.05$) which is in accordance with other federal surveys. A 95 percent confidence level means that there was a 5% chance of any response falling outside the defined margin of error, due to chance. Margin of error is defined as $1.96 * \sqrt{(\sigma/n)}$ for each question (parameter). The MOE is commonly used to indicate how many percentage points estimates will differ from the real population value. For example, with an MOE of 3 percent, this means the estimate (statistic) for the sample will be within 3 percentage points of the true value (parameter) in the population. The MOE is calculated by finding the critical value of the z-score (1.96 for 95% confidence level), sigma (σ) is the standard deviation, and n is the sample size.

Based on this approach, of the final 35,455 usable next of kin records, 19,476 were sampled (54.93%). Following National Change of Address (NCOA) file cleaning, surveys were mailed to 19,010 next of kin. 12,280 surveys were mailed to funeral directors after being “de-duplicated” and undergoing NCOA cleaning who had (1) assisted with interments at national cemeteries from January 1, 2023 until December 31, 2023; (2) assisted with interments at state, tribal or territorial Veterans cemeteries during that same period; or (3) who assisted with obtaining memorial products for interments during that period.

Vistra mailed each funeral director three survey instruments contained in one physical survey package: the 2024 National Cemeteries Satisfaction Survey, the 2024 State, Tribal or Territorial Veterans Cemetery Satisfaction Survey, and 2024 the Memorial Products Service Survey. Funeral directors were asked to complete all sections applicable to their experience.

Mailing Protocol and Schedule

The mailing protocol consisted of four waves:

- Wave 1:
 - A cover letter signed by the Director of the Veterans Cemetery Grants Program for the next of kin State, Tribal or Territorial Veterans Cemetery survey, requesting the respondents’ participation, a copy of the questionnaire, and a return envelope.
 - A cover letter signed by the Principal Deputy Under Secretary for Memorial Affairs for the funeral directors survey, requesting the respondents’ participation, a copy of the questionnaire, and a return envelope.
- Wave 2: A reminder/thank you postcard.
- Wave 3: A second copy of the questionnaire, a return envelope, and a cover letter.
- Wave 4: A reminder/thank you postcard.

Residents of Puerto Rico were mailed Spanish-language materials. Spanish surveys were sent to 70 next of kin and 85 funeral directors.

The mailings took place according to the below schedule.

- The cohort 1 mailing included:
 - English surveys for next of kin with January 1 to June 30, 2023 interment dates.

Survey Help Line

To facilitate responses during the 2024 survey administration period, Vistra maintained a survey-specific, toll-free survey Help Line and email address where respondents could ask questions. A live agent returned all survey-related calls and emails within 24 hours or the next business day.

Overall, during the survey administration period 808 respondents called or emailed (750 calls, 58 emails) the Help Line or email address with questions pertaining to the 2024 NCA Customer Satisfaction Surveys. Calls and emails were fielded from February 21 to June 14, 2024.

The majority of calls/emails received pertained to one of the following:

- Respondent provided information
 - Respondents provided general information about the status of their survey. This information generally included if they sent in the survey, when they would send the survey, or why they would not be completing the survey. Respondents also oftentimes provided information about their loved one's service or delivery of their marker/headstone/columbarium niche.
- Respondent had a question about the survey
 - Questions varied by respondent, but common themes included how to answer a particular question, not understanding terminology on the survey, not understanding the difference between a "national" and "state, tribal or territorial" cemetery, inquiries on whether they could take the survey on behalf of next of kin (deceased or unable to take it), and how to access the online survey.
- Respondent requested a paper survey
 - Respondents requested a paper survey for the following reasons: they did not receive the initial survey, they misplaced or discarded the survey, or they could not remember whether or not they mailed in the survey.
- Respondent already returned the survey
 - Respondents called in/emailed to report that they had already submitted the survey on a previous date but for some reason received another survey in the mail.
- Respondent did not ask a question / Provided name or phone number
 - Respondents simply left their name and/or phone number on the help line or email.

Note that the "Call/Email Reason" is based on the initial voice message left on the Help Line or email received, which in most instances involved one issue or question. In other instances, the message was not always clearly defined or stated. However, upon call or email back, the respondent may have mentioned several issues. The "Action Taken" was the most important item categorized, for which requesting to be added to the "Do not contact (DNC) or survey list" took precedence.

Appendix C: User Guide

SECTION DESCRIPTION

- This section presents an explanation of how to read and interpret the graphs and tables used in this report.
- Stacked bar graphs and data tables are used to illustrate the results of survey items with a continuous response scale (e.g., “Strongly agree” to “Strongly disagree”).
- Standard bar graphs are used to illustrate the results of survey items with a nominal response scale (i.e., categorical responses with no rank order such as Veteran status, race, ethnicity, type of communication, etc.).

Question Numbers

Questions that were asked of both next of kin and funeral directors are presented together in All Respondents graphs followed by the sample type’s respective graph. When presented together, the first number presented for the question is the question number for next of kin, and the second is the question number for funeral directors. In the below example, Question 46 was asked of next of kin in the 2024 State, Tribal or Territorial Veterans Cemeteries Next of Kin/Family Member Satisfaction Survey, while Question 34 was asked of funeral directors in the 2024 Funeral Director Satisfaction Survey.

Stacked Bar Graphs

Stacked bar graphs are used in this report to illustrate the results of survey items with a continuous response scale (e.g., “Strongly agree” to “Strongly disagree”). The graphs depict the frequency of positive responses to an item, while maintaining the distinction between the degree of endorsement (e.g., “Agree” and “Strongly agree”). In each stacked bar graph, the percentage of participants responding positively to the item is depicted across all state, tribal or territorial Veterans cemeteries survey participants.

Question 46/34: The overall appearance of the state, tribal or territorial Veterans cemetery is excellent.

A survey year key is located at the bottom of the graph. When data are available, the graph will display data from the current year and the previous year. According to the key in this example, 2024 data are shown by the top blue bars (darkest shade), 2023 data are shown by the middle green bars (medium shade), and 2022 data are shown by the orange bars (lightest shade).

The percentages to the right of the chart represent the percentage of participants who responded positively to the item (i.e., the sum of both moderate and strong positive responses). The percentages in the middle are the strong positive response (in this case, “Strongly agree”) and the percentages on the

Appendix C: User Guide

left are the moderate responses (in this case, “Agree”). For example, in the above graph 15.97% of all respondents selected “Agree” in 2024 and 82.57% selected “Strongly agree,” so in total, 98.54% of participants responded positively to this item.

When an NCA KPI target exists for an item, the KPI target is presented at the top left of the graph. This is meant to aid with the comparison between NCA’s KPI target on the item and the actual satisfaction survey data. In this example, the KPI target is 99.00%, while the actual satisfaction scores on this item have ranged from 98.15% to 98.55%. Note that KPI targets exist for only a subset of the items on the survey; thus, all stacked bar graphs do not display a KPI target.

Data Tables

Accompanying each stacked bar graph is a data table that presents detailed item-level results for the current year and the previous year (when available). The total number of respondents (n) and the percentage of respondents selecting each possible response option are provided.

	Year	n	Strongly agree	*Change Score	Agree	Neither agree nor disagree	Disagree	Strongly disagree
All State / Tribal Cemeteries	2024	8505	82.57%	1.09%	15.97%	1.03%	0.22%	0.20%
	2023	8200	81.48%	-1.08%	16.67%	1.49%	0.24%	0.12%
	2022	8700	82.56%	2.26%	15.99%	1.08%	0.22%	0.15%

Change scores represent the difference between the percentages of participants selecting the most positive response option (e.g., “Strongly agree,” “Very satisfied”) for the row year versus the previous year. For example, in the above table 82.57% of respondents selected “Strongly agree” in 2024, while 81.48% selected this option in 2023. The change score was calculated as follows: $82.57\% - 81.48\% = 1.09\%$. Although 2021 data are not presented in the table, the 2022 change score represents the difference between the percentage of respondents selecting “Strongly agree” in 2022 and in 2021.

Positive change scores indicate an improvement since the previous year, while negative change scores indicate a decline in the percentage of participants who selected the most positive response option.

All cemeteries with 30 or more responses from next of kin and funeral directors are reported. Individual cemetery reports were not produced for cemeteries that did not meet this threshold. All cemeteries’ responses are included in the total sample for the national and State-level reports.

Standard Bar Graphs

While stacked bar graphs are used for all items that are assessed on a continuous scale (e.g., “Strongly agree” to “Strongly disagree”), standard bar graphs are used for all items assessed on a nominal scale (i.e., categorical responses with no rank order such as Veteran status, race, ethnicity, type of communication, etc.).

Standard bar graphs list all possible response options along the vertical axis. If available, data are presented for the current year and the two previous years. The color to designate each year’s data is presented in the survey year key. In the above example, 2024 data are represented by the top blue bars, 2023 data are represented by the middle green bars, and 2022 data are represented by the bottom yellow bars. Thus, 41.46% of respondents selected 1-3 times in 2024, 39.28% selected 1-3 times in 2023, and 43.24% selected 1-3 times in 2022.

The graph above depicts an example item in which respondents could select only one option, so that for each year, data will sum to approximately 100% across the possible response options (the total may vary slightly due to rounding).

Items on which respondents were instructed to “Mark all that apply” may also be depicted with standard bar graphs, but percentages may not sum to 100%. Despite this difference, the graphs can be interpreted in the same manner.

Data tables are not provided for these items because the standard bar graphs depict the full range of response options, unlike the stacked bar graphs that present only the positive response options.

Since a data table is not provided, the total number of respondents for each of the three years is presented at the bottom of the graph.

Appendix E: Response Rates

National Response Rates

Nationally, the survey yielded a response rate of 35.59% (44.53% for next of kin and 22.06% funeral directors). The response rate is calculated by dividing the number of completed questionnaires by the number of eligible questionnaires.

The funeral director response rate is reported only at the national level.

Eligible questionnaires were those that were returned completed and those that were not returned. Ineligible questionnaires were those that were returned undeliverable. 1,050 undeliverable pieces of mail (3.36%) were received over the course of the 2024 survey.
